Description :

It used to recycle the waste HDPE/LDPE/PP Bottle and Buckets, hollow containers and so on the production line including the Conveyor Belt, Metal Detector, Plastic Wet Crusher, Hot Washer, High Speed Friction Washer, Floating Washer, Dewatering Machine, Drying System Material Collecting System. We provide effective, customized proposals and cost-effective solution by listening to and understanding our customer's need.

BS-300 - BS-1000

Description :

Usually, PP woven jumbo bags are always very dirty and with a lot of residue material. Before Pelletizing, usually, we have to wash them first, after we get the clean PP woven bag scraps, and then we can pelletize them to recycle. as you know, the PP woven jumbo bag is too strong to crush/grind for common crusher machine/granulator, additionally, most of PP woven jumbo bags have a specially strong belt. That is why it is a headache problem for some small factory or company to resolve. First, using PP woven jumbo bag's specially designed double shaft shredder machine to shred the woven bag into big pieces, and then we can use the common PP woven bag scraps washing line and also the PP woven jumbo bag pelletizing line to recycle them directly, finally, we can get the clean, dry PP woven bag scraps or PP pellets.

PET PLASTIC BOTTLE CRUSHING RECYCLING WASHING LINE

- ▶ Best Performance
- ▶ High Quality
- ▶ High Technology

Description :

BS-500 - BS-5000

The PET bottle recycling plant takes dirty bottles and transforms them into clean PET flakes. And the flakes can be further processed and reutilized with high commercial value. The production capacity we can make on the PET Bottle washing and recycling line can be 300kg/h to 3000kg/h. The line main purpose is intending to get the clean flakes from the dirty even mixture bottles or bottles slice during dealing with the whole washing line. And also get clean PP/PE collection, labels, and paper clips, etc.

SQUEEZING DRYING PELLETIZER EQUIPMENT

This Film Squeezing Machine is used for drying those washed film, woven bags, etc. and make it like granules.

Best Performance

High Technology

High Quality

SQUEEZE DRYER MACHINE

PP PE LDPE HDPE PVC Film Plastic Squeeze Dryer Working process:
By plastic film squeezing dryer, the washed film can be squeezed to dehydrate water of films or fluffy stuff. The film is squeezed to become flakes or blocks. The film plastic moisture will be lowered down to 1-3%.

- ▶ Best Performance
- ▶ High Technology
- ▶ High Quality

BS-300 - BS-400

Applicable Material :

SQUEEZE DRYER MACHINE

1. Plastic squeezing machine is made by the advanced Italian techniques, specially screw pressing dewatering design;
2. Plastic squeezing machine is equipped with an electric control cabinet, feeder mouth is easy to control the drying effect;
3. Plastic squeezing machine is especially for plastic film, plastic bags, woven bags, Jumbo bags. Solve the drying problem in the past.
4. Instead of the dewatering machine, hot blower in the recycling line.
5. Easy to operate, drying effect can reach 95%.

Specification :

Type :	BS-300	BS-400
Dimension :	2450x800x1800 mm	2450x800x1900
Inlet Size :	700x670 mm	800x760 mm
Motor Power :	18.5 KW	22 KW
Rotated Speed :	30r / Min	30r / Min
Capacity :	500 KG/ H	800 -1000 KG/ H

SERIES SQUEEZING DRYING PELLETIZER

Woven Bag

Plastic fiber waste

Agricultural Film

- ▶ Best Performance
- ▶ High Technology
- ▶ High Quality

BS-250 - BS-400

Description :

Its recycling is an important part of environmental protection. The squeezing pelletizing machine, as a machine integrating dewatering and granulation, plays a very important role in the process of processing plastic products. Solve the problem of difficult dehydration of traditional soft film or filamentary plastics.

SERIES SQUEEZING DRYING PELLETIZER

Plastic squeezing pelletizing machine can easily control the moisture of the cleaned material below 3%. At the same time, it can also control plastic film, tons of bags, diapers, etc. that are traditionally difficult to dehydrate. The filamentous plastic is semi—plasticized into granules, which improves its bulk density, facilitates the granulation of the subsequent equipment, and can also replace the traditional agglomerator!

BS-300 - BS-2000

Blades with different hooks

Single-Hook Blade

Two-Hook Blade

Three-Hook Blade

Five-Hook Blade

Multi-Hook Blade

Hook Type

Single-hook blade

- : Application Characteristic.
- : Single hook blade configuration of the most universal blade choices, it has a powerful structure and can be used in a wide range of applications.

Two-hook or multi-hook blade

Multi hook blade configuration is used primarily for shredding easy to shred product, it is more efficient when doing light shredding applications.

DOUBLE SHAFT SHREDDER

This series shredders have been designed for a wide array of applications and industries, suitable for shredding solid material such as E-waste, metal, wood, plastic, scrap tires, packaging barrel, pallets, etc. Depending on input material and the following process the shredded material can be used directly or go into the next step of size reduction. It is widely used in industry waste recycling, medical recycling, electronic recycling, pallet recycling, municipal solid waste recycling, plastic recycling, tire recycling, paper making industry and etc.

Specification :

BS-1800 :	75 + 75	1800 X 1400
BS-2000 :	90 + 90	2000 X 1400

The effect shredding rotor length, the shredding blades' rotating diameter can be tailor-made, additionally, the driving method also can be hydraulic motor.

HEAVY DUTY CRUSHER MACHINE EQUIPMENT

This machine type crusher is suitable for the material which has big shape , high-strength and massive capacity. For example : plastic film, pipe , sheet, profile, PET bottles, hollow barrel-and soon.

- Best Performance
- High Technology
- High Quality

HEAVY DUTY CRUSHER MACHINE

Features :

BS-35/06 - BS-70/12

Shock Absorber Foot

Foot with shock absorber to reduce the vibration and eliminate noise.

Hydraulic Connector

Oil link device is installed for each machine to keep the order lines and smooth of oil pipes.

Metal Detector

Metal detector can be combined with belt conveyor, and can interlock with control system.

Hydraulic Equipment

The hydraulic equipment can control the hydraulic cover opening the crusher room.

Rotor

Special L design rotor help the machine achieve the excellent grinding result saving the energy and reducing the noise.

Cutting Chamber

It's easy to open the full chamber, Loosen the nut, the chamber can be open within short time.

Screen

Special material assures the long-life abrasion resistance of the screen.

Screen Locked Device

Simple design help convenient operation and reduce much time to replace the screen.

Motor Overload

Equipped electrical current relay, motor overload protector and other multiple safety devices.

Bolt Conveyor

Plastic scraps such as plastic film, sheet, profile, PET Bottle into the crushing room trough belt conveyor.

Hydraulic Cylinder

Hydraulic devices makes opening the chamber and screen much easier.

This series heavy type crusher is suitable for the material which has big shape, high-strength and massive capacity. For example : plastic film, pipe , sheet , profile, PET bottles, hollow barrel and soon.

HEAVY DUTY CRUSHER MACHINE

1. High quality thickened-steel welded with compact structure
2. **Blade** : The cutting tool adopts imported D2 material and is treated with special technology, which is more durable
3. **Bi-parting chamber** : design convenient for knife change
4. **Rotor** : equipped with replaceable wear-resistant plates on both sides
5. With many structures optional, good to improve efficiency and extend usage life
6. High-coefficient and outboard bearings to minimize the damage of dust
7. **Screen** : Various types and meshes optional
8. **Hopper** : Automatic power cut-off to ensure safe operation many power-driven and hydraulic-driven opening devices optional convenient for maintenance
9. **Safety switch** : multiple-protective function, conforming to CE safety standard.

SOUND PROOF CRUSHER MACHINE

- Best Performance
- High Quality
- High Technology

More than 4 Layers box

Sound-proof cotton

Cooling water circulation system

Description :

BS-10 - BS-50

Sound-Proof crusher machine is suitable to crush different hard and soft plastic wastes in different shapes like PET Bottles, PP/PE films, PVC pipes and fittings, plastic blocks, plastic sheets, etc. Unique design, full enclosure soundbox can effectively absorb the noise produced by crushing and vibration, and the noise is very low (85dB or so) when grinding, so as to achieve the purpose of low noise and environmental protection. The unique cooling water circulation system will bring the heat produced by the machine to the outside of the machine, which can effectively avoid comminution agglomeration.

▶ Best Performance ▶ High Technology ▶ High Quality

Type :	BS-7	BS-10	BS-15	BS-20	BS-30
Power (KW) :	5.5	7.5	11	15	22
Quantity of Rotating Blades :	3	6	6	6	6
Quantity of Fixed Blades :	2	2	2	4	4
Rotate Speed (R/Min) :	800	720	720	620	576
Sieve Size (MM) :	10	10	10	12	12
Weight (KG) :	410	580	740	980	1950
Max Breaking Capacity (KG/Hr) :	200-300	400-600	500-700	600-800	700-900
Size of Feeding Inlet (MM) :	300x210	400x240	500x300	600x310	800x400

PELLETIZING MACHINE EQUIPMENT

Best Performance

High Technology

High Quality

PP, LDPE, LLDPE, HDPE, BOPP, PET flakes, Recycled Grinded Plastic,
Plastic material from agglomerator, grinded plastic film etc.

PET FLAKES PELLETIZING PRODUCTION LINE

- ▶ Best Performance
- ▶ High Quality
- ▶ High Technology

PET plastic pelletizing machine is design specializes for recycling the recycled washed plastic PET plastic flakes/scraps, such as Cola plastic bottle flakes/scraps, and etc.

BS-20 - BS-92

Production Process

Conveying feeding ▶ Pre crystallization and drying ▶ Conveying feeding
▶ Metal detector ▶ Parallel twin screw extruder ▶ Hydraulic screen
changer ▶ Plastic strand die head ▶ Water cooling tank ▶ Dryer
▶ Plastic strand cutter ▶ Storage silo

PET FLAKES PELLETIZING PRODUCTION LINE

PET plastic pelletizing machine is design specializes for recycling the recycled washed plastic PET plastic flakes/scraps, such as Cola plastic bottle flakes/scraps, and etc.

Specification :

▶ Best Performance ▶ High Technology ▶ High Quality

Type :	BS-20	BS-35	BS-50	BS-65	BS-72	BS-92
Screw Dia (MM) :	21.7	35	50.5	62.4	71.2	21.7
Rotate Speed (MM) :	600	400	400/600	500/600	400/500	400/500
Motor Power :	4	18.5	55	75	110	250
L/D :	32-40	28-48	28-40	28-48	28-48	28-40
Capacity (KG/h) :	2-10	5-30	40-80	100-300	300-600	600-1000

The above is just for reference, the real capacity or specifications dependent on your exclusive material.

COMPACTOR PELLETIZING MACHINE (SINGLE STAGE)

- ▶ Best Performance
- ▶ High Quality
- ▶ High Technology

PET plastic pelletizing machine is design specializes for recycling the recycled washed plastic PET plastic flakes/scraps, such as Cola plastic bottle flakes/scraps, and etc.

BS-85 - BS-180

Applicable Plastic Material

PP, LDPE, LLDPE, HDPE, BOPP etc. Material Status: woven bag, Printed plastic film (Rolls, loose, bundled), agriculture film, foamed plastic, etc. The above material will be agglomerated, and then fed into the extruder machine; thanks to the agglomerator, the extruder can achieve the MAX capacity, and the capacity range about: 100-1000kg/h.

COMPACTOR PELLETIZING MACHINE (SINGLE STAGE)

PET plastic pelletizing machine is design specializes for recycling the recycled washed plastic PET plastic flakes/scraps, such as Cola plastic bottle flakes/scraps, and etc.

Applicable Material :

PP, LDPE, LLDPE, HDPE, BOPP etc. Material Status: woven bag, Printed plastic film (Rolls, loose, bundled), agriculture film, foamed plastic, etc. The above material will be agglomerated, and then fed into the extruder machine; thanks to the agglomerator, the extruder can achieve the MAX capacity, and the capacity range about: 100-1000kg/h.

Specification :

▶ Best Performance ▶ High Technology ▶ High Quality

Type :	BS-85	BS-100	BS-120	BS-160	BS-180
Screw Dia (MM) :	85	100	120	160	180
L / D :	25-36	25-36	25-33	25-33	25-33
Capacity (Kg/h) :	120-180	200-250	400-500	450-700	500-1000

The above is just for reference, the real capacity or specifications dependent on your exclusive material.

COMPACTOR PELLETIZING MACHINE (DOUBLE STAGE)

▶ Best Performance ▶ High Technology ▶ High Quality

Melt Filter System

Cutting Pelletizing System

Dewatering Drying Pellete Storage System

BS-85/85 - BS-180/180

Applicable Plastic Material :

PP, LDPE, LLDPE, HDPE, BOPP etc.

Material status: woven bag, printed plastic film (Rolls, loose, bundled), agricultural film, foamed plastic etc. Double stage pelletizing machine is mainly used for higher water content and contamination waste plastic, first stage extruder adopts exhaust type barrel, the screw which can effectively de-gassing and eliminate moisture and contamination; and the baby extruder usually adopt small L/D extruder, further plasticizing the material and filter contamination which can achieve stable extrusion. Capacity: 150—1000kg/h.

COMPACTOR PELLETIZING MACHINE (DOUBLE STAGE)

Applicable Plastic Material :

PP, LDPE, LLDPE, HDPE, BOPP etc. Material status: woven bag, printed plastic film (Rolls, loose, bundled), agricultural film, foamed plastic etc. Double stage pelletizing machine is mainly used for higher water content and contamination waste plastic, first stage extruder adopts exhaust type barrel, the screw which can effectively de—gassing and eliminate moisture and contamination; and the baby extruder usually adopt small L/D extruder, further plasticizing the material and filter contamination which can achieve stable extrusion. Capacity: 150-1000kg/h.

Specification :

▶ Best Performance ▶ High Technology ▶ High Quality

Type :	BS-85/85	BS-100/100	BS-120/120	BS-160/160	BS-180/180
Screw Dia (MM) :	85	100	120	160	180
L / D :	25-36	25-36	25-33	25-33	25-33
Capacity (Kg/h) :	120-180	200-250	400-500	450-700	500-1000

The above is just for reference, the real capacity or specifications dependent on your exclusive material.

RECYCLED GRINDED MATERIAL PELLETIZING MACHINE

Single-Stage

- ▶ Best Performance
- ▶ High Technology
- ▶ High Quality

BS-65D - BS-200D

Applicable Plastic Material :

Recycled Grinded Plastic, Plastic material from agglomerator, ground plastic film, Single-stage pelletizing machine is mainly used for common plastic pelletizing, Capacity: 150—1000kg/h.

RECYCLED GRINDED MATERIAL PELLETIZING MACHINE

Single-Stage

Recycled Grinded Plastic, Plastic material from agglomerator, ground plastic film, Single-stage pelletizing machine is mainly used for common plastic pelletizing, Capacity: 150—1000kg/h.

Specification :

▶ Best Performance ▶ High Technology ▶ High Quality

Type :	BS-65D	BS-90D	BS-100D	BS-120D	BS-150D	BS-200D
Screw Dia (MM) :	65	90	100	120	150	200
L / D :	28-33	28-33	28-33	25-33	25-33	25-33
Capacity (Kg/h) :	60-80	80-120	100-180	200-300	300-500	500-800

The above is just for reference, the real capacity or specifications dependent on your exclusive material.

RECYCLED GRINDED MATERIAL PELLETIZING MACHINE Double-Stage

- ▶ Best Performance
- ▶ High Technology
- ▶ High Quality

BS-80/80 - BS-180/180

Applicable Plastic Material :

Recycled Grinded Plastic, Plastic material from agglomerator, ground plastic film. Double stage pelletizing machine is mainly used for higher water content and contamination waste plastic, first stage extruder adopts exhaust type barrel, the screw which can effectively de-gassing and eliminate moisture and contamination; and the baby extruder usually adopt small L/D extruder, further plasticizing the material and filter contamination which can achieve stable extrusion. Capacity: 150-1000kg/h.

RECYCLED GRINDED MATERIAL PELLETIZING MACHINE

Double-Stage

Recycled Grinded Plastic, Plastic material from agglomerator, ground plastic film. Double stage pelletizing machine is mainly used for higher water content and contamination waste plastic, first stage extruder adopts exhaust type barrel, the screw which can effectively de-gassing and eliminate moisture and contamination; and the baby extruder usually adopt small L/D extruder, further plasticizing the material and filter contamination which can achieve stable extrusion. Capacity: 150-1000kg/h.
